

Assetra

UI/UX Prototype Brief

Built from the Assetra brand overview, product requirements, and supplied logo direction.

Brand expression: professional legal-tech, structured workflows, secure collaboration, modern enterprise clarity.

Brand Foundation

- **Brand Name:** Assetra
- **Tagline:** Stay Organized
- **Vision:** Trusted digital infrastructure for estate and asset management within law firms.
- **Mission:** Help law firms manage estates with structure, precision, security, and confidence.
- **Primary Users:** Estate planning law firms, individual estate lawyers, and probate lawyers.
- **Secondary Users:** Legal assistants, interns, and estate administration teams.
- **Brand Personality:** Structured, professional, secure, and trustworthy.
- **Logo Direction:** Interconnected nodes symbolizing the relationships between clients, assets, beneficiaries, and lawyers.

Design Tokens

Token	Value	Usage
Primary	#1E3A8A	Navigation, primary buttons, headings, trust signals
Secondary	#10B981	Success states, progress, positive metrics, accents
Background	#F8FAFC	App background, cards, clean legal-tech canvas
Text	#111827	Body content and high-contrast interface text
Typography	Manrope	Headings, body copy, labels, and dashboard UI

Modern UI Direction

- Use a clean SaaS layout with a left sidebar, a light interface, strong spacing, and legal-tech professionalism.
- Prefer rounded cards, high-contrast tables, subtle shadows, and restrained motion instead of flashy gradients.
- Keep the visual language structured and calm: deep blue for authority, emerald for positive actions, charcoal for clarity.
- Use the logo node pattern as a subtle background motif for hero areas, empty states, and authentication screens.
- Design with accessibility in mind through generous spacing, large hit areas, strong contrast, and clear status labels.

Global Components

- Top navbar with firm name, page title, notifications, search, and profile menu
- Left sidebar navigation with Dashboard, Clients, Approvals, Documents, Users, Audit Log, and Profile
- Primary, secondary, tertiary, and danger buttons
- Form controls including input, textarea, dropdown, search, date picker, file upload, and toggles

- Cards, data tables, tabs, drawers, modals, timeline blocks, progress bars, and badge sets
- Empty states, loading skeletons, validation messages, confirmation dialogs, and toast notifications

Page-by-Page Prototype Specification

1. Login Page

Primary Goal: Secure entry point for lawyers, admins, and interns inside one firm.

Primary Users: All authenticated users

Layout Direction: Centered authentication card on a soft white background with a compact brand panel and trust-focused messaging.

Required UI elements:

- Assetra logo lockup at the top
- Brand headline with the tagline 'Stay Organized'
- Username or email input
- Password input
- Show or hide password control
- Remember me checkbox
- Primary sign-in button in deep blue
- Secondary helper text for internal firm access only
- Inline validation and authentication error state
- Right-side or lower supporting brand illustration using node-and-connection shapes

2. Dashboard

Primary Goal: Give lawyers and admins a fast operational overview of estate work.

Primary Users: Lawyers, Admins

Layout Direction: Top navbar plus left sidebar with a stat-card hero row, activity widgets, and quick-action cards.

Required UI elements:

- Welcome header with user name, role, and current date
- Quick actions for Add Client, Add Asset, Upload Document, and View Approvals
- Summary cards for Total Clients, Total Assets, Active Estates, and Pending Approvals
- Estates by status chart with brand color-coded categories
- Assets by category chart
- Recent activity feed with user avatars and timestamps
- Pending approvals widget
- My assigned clients widget
- Recently uploaded documents widget

3. Clients List

Primary Goal: Allow fast search, filtering, and entry into each estate workspace.

Primary Users: Lawyers, Admins, Interns

Layout Direction: Data table driven page with strong filter bar and prominent add action.

Required UI elements:

- Page title and Add Client button
- Search input for name, phone, or email
- Status filter dropdown
- Assigned lawyer filter dropdown
- Sort dropdown and Reset filters action
- Client data table with status badges and assigned lawyer avatars
- Row action menu with View, Edit, and Close Estate
- Empty state with CTA when no clients exist
- Pagination controls

4. Client Create or Edit

Primary Goal: Capture and update estate owner information cleanly and accurately.

Primary Users: Lawyers, Admins, Interns

Layout Direction: Two-column structured form with grouped sections and a sticky action bar.

Required UI elements:

- Basic information section
- First name, last name, email, phone, and address fields
- Estate status selector
- Date of death field
- Notes textarea
- Inline validation messages
- Save Draft, Save Client, and Cancel actions
- Delete action in edit mode
- Unsaved changes warning

5. Client Detail Workspace

Primary Goal: Serve as the operational center for a single estate and all related actions.

Primary Users: Lawyers, Admins, Interns

Layout Direction: Hero header followed by a tabbed workspace with cards, tables, and side drawers.

Required UI elements:

- Client name, status badge, and assigned lawyer avatar group
- Quick summary chips for assets, beneficiaries, documents, and pending approvals

- Primary actions for Edit Client, Add Asset, Add Beneficiary, and Upload Document
- Admin-only Close Estate or Reopen Estate controls
- Tabs for Overview, Assets, Beneficiaries, Distributions, Documents, and Activity
- Overview cards for client profile and estate status timeline
- Assets table with category, value, and distribution state
- Beneficiary cards or table with relationship details
- Distribution table with ownership percentage and approval status
- Documents panel with preview or download actions
- Activity timeline for changes, approvals, and uploads

6. Asset Create or Edit

Primary Goal: Document a client asset with category, value, and supporting notes.

Primary Users: Lawyers, Admins, Interns

Layout Direction: Compact form with finance-aware field spacing and clear asset categorization.

Required UI elements:

- Client selector
- Asset title input
- Category dropdown
- Description textarea
- Estimated value field with currency styling
- Active toggle
- Save and Save plus Add Distribution actions
- Validation hints for value formatting

7. Beneficiary Create or Edit

Primary Goal: Create and maintain beneficiary records linked to a client estate.

Primary Users: Lawyers, Admins, Interns

Layout Direction: Straightforward form page with contextual relationship guidance.

Required UI elements:

- Client selector
- Beneficiary first and last name fields
- Email and phone fields
- Relationship to client field
- Notes textarea
- Save, Cancel, and Delete actions
- Optional linked asset summary for edit mode

8. Distribution and Approval Page

Primary Goal: Split assets across beneficiaries and manage the approval lifecycle.

Primary Users: Lawyers, Admins, Senior Lawyers

Layout Direction: A data-rich management page with percentage progress visuals and approval controls.

Required UI elements:

- Client context label and asset selector
- Distribution table with beneficiary, relationship, ownership, and status
- Add Distribution action
- Total allocated percentage progress bar
- Remaining percentage indicator
- Validation banner if percentages exceed 100
- Approve and Reject action buttons
- Reject reason modal
- Approval summary strip with approver and timestamp

9. Documents Page

Primary Goal: Organize uploaded files linked to clients and assets.

Primary Users: Lawyers, Admins, Interns

Layout Direction: Table-driven repository page with upload modal and document preview area.

Required UI elements:

- Upload Document button
- Search field for title
- Filter by linked type, uploader, and date
- Document table with file type icon and metadata
- View and Download actions
- Delete action for permitted roles
- Drag-and-drop upload area in modal
- Client selector and optional asset selector
- Preview panel for supported files

10. Approvals Queue

Primary Goal: Help admins and senior lawyers clear pending decisions efficiently.

Primary Users: Admins, Senior Lawyers

Layout Direction: Review queue page with filter bar, decision table, and detail drawer.

Required UI elements:

- Pending approvals count badge
- Filters for status, client, asset, beneficiary, and date
- Approval queue table
- Columns for client, asset, beneficiary, percentage, current status, and created date

- Approve and Reject buttons per row
- Side drawer with asset summary, beneficiary details, and notes
- Reject confirmation modal with reason field

11. User Management

Primary Goal: Allow admins to manage firm users and roles without complexity.

Primary Users: Admins

Layout Direction: Enterprise-style administration page with user table and creation drawer.

Required UI elements:

- Add User button
- Search by name, username, or email
- Role filter and active status filter
- Users table with role badge, senior lawyer indicator, and last login
- Create or edit user form
- Role selector and senior lawyer checkbox
- Password field for new users
- Role guidance panel explaining Admin, Lawyer, and Intern permissions

12. Audit Log

Primary Goal: Provide accountability and a searchable record of firm activity.

Primary Users: Admins, Lawyers

Layout Direction: Dense but readable log interface with filter chips and an expandable details pane.

Required UI elements:

- Action type, user, model, and date filters
- Search box for descriptions
- Audit table with timestamp, actor, action, target model, and summary
- Metadata preview snippet
- Detail drawer showing full metadata and related entity link

Figma AI Prompt Direction

- Create a modern legal-tech SaaS dashboard for Assetra using deep blue, emerald, soft white, and charcoal with Manrope typography.
- Design the interface to feel structured, secure, professional, and trustworthy, not generic startup or fintech heavy.
- Use left navigation, stat cards, clear data tables, approval badges, modal interactions, and tabbed estate workspaces.
- Make the Client Detail page the operational center with tabs for Overview, Assets, Beneficiaries, Distributions, Documents, and Activity.

- Ensure responsive layouts for desktop and tablet, with simplified stacked sections on mobile.

Suggested Figma Prompt

Design a modern lawyer-centric legal SaaS interface for Assetra, a secure estate and asset management platform. Use Manrope typography and a color system based on deep blue #1E3A8A, emerald #10B981, soft white #F8FAFC, and charcoal #111827. The product should feel structured, secure, and trustworthy. Build polished desktop-first screens for Login, Dashboard, Clients List, Client Detail Workspace, Asset Form, Beneficiary Form, Distribution Management, Documents, Approvals Queue, User Management, and Audit Log. Use a left sidebar, top navbar, cards, data tables, tabs, filters, upload areas, status badges, approval actions, timelines, and professional empty states. Incorporate subtle node-based motifs inspired by the Assetra logo.
